# Management statement of responsibility for Financial Reporting

The accompanying financial statement of the International Water Management Institute (IWMI), for the year ended December 31, 2011 and 2010 are the responsibility of the management. IWMI management also claims responsibility for the substance and objectivity of the information contained therein.

Our financial reporting practices follows the "Accounting Policies and Reporting Practices Manual – Financial Guidelines Series No. 2" of the CGIAR. IWMI maintains a system of internal control designed to provide reasonable assurance that assets are safeguarded and transactions are properly recorded and executed in accordance with management's authorization.

A system of reporting within the Institute present the management with an accurate view of the operations, enabling us to discern risks to our assets or fluctuations in the economic environment of the institute at an early stage and at the same time providing a reliable basis for the financial statements and management reports.

The board of Governors exercises its responsibility for these financial statements through its Finance and Audit committee. The committee meets regularly with management and representatives of the external auditors to review matters relating to financial reporting, internal controls and auditing.

**Dr. Colin Chartres**Director General

Director Finance & Administration

# Statement of the Board Chair For the Year ended December 31, 2011

During the year under review, the International Water Management Institute saw the approval of the CGIAR Research Program (CRP5) on "Water, Land & Ecosystems" that will further extend the Institute's collaborative work within and outside the Consortium of CGIAR Centers. IWMI is also partnering with other CGIAR centers in CRPs namely, CRP 1.1 on "Dryland Systems", CRP 1.3 on "Aquatic Agricultural systems", CRP7 on "Climate Change, Agriculture & food security" and the proposed CRP 1.2 on "Humid Tropics". While CRP 5 will be operational as of January 2012, the Institute has already started the ground work to put the structure and people in place. IWMI has mapped its activities to various CRPs and is confident of delivering most of its scientific programs through these CRPs.

One of the risks arising out of the CRPs was the uncertainty about the amount of funding. We are pleased to note that the Consortium office has put significant efforts in bringing clarity not only to funding levels but also funding processes. It will be critical for IWMI and all centers to fully cost future projects and we continue to do so, wherever possible, following the CGIAR financial guidelines to minimize financial risks. Recovering full costs from all donor projects remains an issue. With the approval of "Common Operational Framework" we will be a step closer to mitigating this risk.

IWMI continued to build on its strong recent financial performance and is in a sound position having ended the year with a surplus. The approval rate of the Institute's project proposals continued to be high, with several additional projects coming on board during 2011. The increased restricted/ bilateral project portfolio resulted in total grant revenue of \$ 34.1 million in 2011 as against \$ 30.9 million in 2010 – an increase of 10%. As a result, IWMI's long term financial stability (adequacy of reserves) was 187 days as of December 2011 and short term solvency (liquidity) indicator was 217 days.

On staffing front, in 2011 we lost several senior, long-serving staff members who took senior positions elsewhere. However, recruitment and internal replacement processes saw their replacement by some excellent individuals, indicating that IWMI is a highly regarded place to work. IWMI now has a cadre of highly competitive senior and middle managers to carry forward science and administration. Late in 2011, Dr. Colin Chartres, IWMI's Director General informed the Board about his intention not to take a second term for personal reasons. The Board formed a committee to oversee the recruitment of his successor (and in February 2012 elected a successor, to commence on 1 October 2012).

Though IWMI's financial situation remains stable, the Center is not immune to new financial or operational risks. The Audit Committee of IWMI's Board of Trustees has taken an active role in monitoring the institute's risk management strategy, not only from the perspective of financial elements, but also with respect to research strategies and issues. More broadly, the Board oversees Center operations in the interest of donors and stakeholders.

On behalf of the members of the Board, I wish to thank IWMI's investors and partners for their continued support and commitment of the work of IWMI.

**Prof. John Skerritt** 

Chair, IWMI Board of Governors

# Statement of Purpose

The International Water Management Institute (IWMI) is one of 15 international research centers supported by a network of 60 governments, private foundations, and international and regional organizations collectively known as the Consultative Group on International Agricultural Research (CGIAR). IWMI is a non-profit organization with a staff of 302 and offices in over 10 countries across Asia and Africa, with its headquarters in Colombo, Sri Lanka. The Institute was established in Sri Lanka in 1985 by an Act of Parliament as an autonomous, non-profit, international research organization. Projects handled by IWMI are administered from its headquarters in Sri Lanka and through its regional and country offices located in India, Pakistan, South Africa, Ghana, Ethiopia, Lao PDR and Uzbekistan. The Institute has satellite offices in Burkina Faso, and Nepal.

The Institute has a multidisciplinary approach to water management research. Most of IWMI's research combines the expertize of economists, agronomists, hydrologists, engineers, sociologists, management specialists and health researchers. The research team is comprised of approximately 98 scientists from 32 different countries.

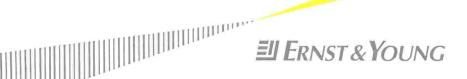

**IWMI's Mission** is to improve the management of land and water resources for food, livelihoods and the environment.

IWMI's Vision is water for a food-secure world (as reflected in its Strategic Plan 2009-2013).

IWMI targets land and water management challenges faced by poor communities in the developing world or in developing countries and through this contributes towards the achievement of the United Nations Millennium Development Goals (MDGs) of reducing poverty, hunger and maintaining a sustainable environment. These are also the goals of the CGIAR.

Research is the core activity of IWMI. The research agenda is organized around four priority themes including Water Availability and Access; Productive Water Use; Water Quality, Health and Environment; and Water and Society. Among the crosscutting activities included in all themes are (a) assessment of land and water productivity and their relationship to poverty, (b) identification of interventions that improve productivity as well as access to and sustainability of natural resources, and (c) assessment of the impacts of interventions on productivity, livelihoods, health and environmental sustainability.

IWMI works on collaborative research with many partners and aims to provide policymakers, development agencies, individual farmers and private sector organizations with up-to-date information on regional, national and global water issues.

# INDEPENDENT AUDITOR'S REPORT TO THE BOARD OF GOVERNORS OF INTERNATIONAL WATER MANAGEMENT INSTITUTE

#### Report on the Financial Statements

We have audited the accompanying financial statements of International Water Management Institute, which comprise the statement of financial position as at 31 December 2011, and the related statement of activities, statement of changes in net assets and cash flow statement for the year then ended, and a summary of significant accounting policies, other explanatory notes and supplementaries.

### Managements Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the recommendations made in the Consultative Group for International Agricultural Research (CGIAR) Financial Guidelines Series No.2 - CGIAR Accounting Policies and Reporting Practices Manual (updated February 2006). This responsibility includes: designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatements, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

#### Scope of Audit and Basis of Opinion

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting policies used and significant estimates made by the management, as well as evaluating the overall financial statement presentation. We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit. We therefore believe that our audit provides a reasonable basis for our opinion.

#### Opinion

In our opinion, so far as appears from our examination, the Institute has maintained proper accounting records for the year ended 31 December 2011 and the financial statements give a true and fair view of the Institute's state of affairs as at 31 December 2011 and its surplus and cash flows for the year then ended in accordance with the recommendations made in the CGIAR Financial Guidelines Series No. 2 - CGIAR Accounting Policies and Reporting Practices Manual (updated February 2006).

At end of year	30,576	27,979

# **Accounting Policies**

The principal accounting policies that were adopted in the preparation of these financial statements are set out below:

# 1. 1 Basis of Accounting

The financial statements are prepared under the historical cost convention on the accrual basis of accounting, in accordance with the CGIAR Accounting Policies and Reporting Practices Manual, Financial Guidelines Series, No.2 as amended in February, 2006.

# 1.2. Significant Accounting Judgments, Estimates and Assumptions

## **Judgements**

In the process of applying the International Water Management Institute's accounting policies, the management has made the following judgment, apart from those involving estimations, which has the most significant effect on the amounts recognized in the Financial Statements.

#### Allowance for Doubtful Debts:

The Institute reviews all receivables at each balance sheet date to assess whether an allowance should be recorded in the statement of activities. The management uses judgement in estimating such amounts in the light of the duration of outstanding and any other factors the management is aware of that indicate uncertainty in recovery.

## **Estimates and Assumptions**

The key assumptions concerning the future and other key sources of uncertainty of estimation at the balance sheet date, that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are discussed below. The respective carrying amounts of assets and liabilities are given in related notes to the Financial Statements.

#### Defined Benefit Plans:

The cost of defined benefit plans - severance, gratuity and leave encashment are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases and mortality rates. Due to the long term nature of these plans, such estimates are subject to significant uncertainty. Refer Note 1.19.

# 1.3. Foreign Currencies

Transactions denominated in currencies other than the reporting currency, United States Dollars (USD), are converted to USD at the exchange rates prevailing at the beginning of the month in which the transaction took place.

Monetary assets and liabilities expressed in currencies other than USD are converted to USD at the rate of exchange prevailing on the date the balance sheet was prepared. Non-monetary items denominated in a foreign currency, which are carried at cost, are reported using the exchange rate prevailing on the date of the transaction.

All exchange gains or losses resulting from such translations are treated as other revenues and gains or other losses and expenses in the statement of activities.

#### 1.4. Revenue

#### I. Definition

Revenue is the gross inflow of economic benefits during the period arising in the course of the ordinary activities of a center where those inflows result in increases in net assets. The major portion of center's revenue is derived through the receipts of donor grants - either "Unrestricted" or "Restricted".

Unrestricted grant revenue arises from the unconditional transfer of cash or other assets to IWMI.

Restricted grant revenue arises from a transfer of resources to IWMI in return for past or future compliance related to the operating activities of the Organization.

Gross inflow of economic benefits include amounts collected on behalf of the principal and which do not result in an increase in the net assets are treated as "Agency Transactions" and are not recognized as revenue. Revenue is treated as the amount of any commission or management fee received.

#### II. Recognition

Grants are recognized as revenues when the outcome of a transaction involving the rendering of services can be measured reliably. Revenue associated with the transaction is recognized by reference to the stage of completion of the transaction at the balance sheet date. When the outcome of the transaction cannot be estimated reliably, revenue is recognized only to the extent of the expenses recognized that are recoverable.

#### III. Valuation

Revenue is measured at the fair value of the consideration received or receivable.

- (a) Cash grants are recorded at the face value of the cash received or the USD equivalent.
- (b) Grant revenue, including non-monetary grants at fair value, is recognized when there is reasonable assurance that:
  - i. the organization will comply with the conditions attached to them; and
  - the grants will be received.
- (c) Grants are recognized as revenue over the periods necessary to match them with the related costs which they are intended to compensate, on a systematic basis.

### 1.5. Other Revenues

Other revenues and gains are recognized in the period in which they are earned.

#### 1.6. Expenses

Expenses are recognized when a decrease in future economic benefits, related to a decrease in an asset or an increase in a liability, has arisen that can be measured reliably.

## 1.7. Allocation of Expenses

Direct costs are charged specifically to the programs benefited. Research support and management, and administrative costs are collectively referred to as indirect costs.

Indirect costs are allocated to programs based on the total direct. The costs of providing the programs and management and general activities have been summarized on a functional basis in the Statement of Activities. Accordingly, certain costs have been allocated among programs and other services, and management and general activities.

#### 1.8. Taxation

The Center is exempt from income tax under the provisions of Section 7 of the Inland Revenue Act No. 10 of 2006 of Sri Lanka. The Center is also exempt from USA (United States of America) tax under Section 501(a) of the Internal Revenue Code of the United States of America, as an organization described in Section 501(c)(3).

# 1.9. Cash and Cash Equivalents

Cash and cash equivalents comprise cash in hand, balances with banks and short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturity periods of three months or less, and which are subject to an insignificant risk of change in value.

## 1.10. Investments

Investments acquired with the intention of disposing the same within one year or less from the acquisition date are classified as current investments. Investments classified as current, as distinguished from cash equivalents, are those that are acquired with original maturities of more than three months, but not exceeding one year.

Current investments represent time deposits with banks that are collateral against national staff loan schemes with original maturities of more than three months.

#### 1.11. Accounts Receivable

All receivable balances are valued at their net realizable value, that is, the gross amount of receivable balances minus, if applicable, allowances provided for doubtful accounts.

Allowances for doubtful accounts are provided in an amount equal to the total receivables shown, or reasonably estimated to be doubtful of collection. The amount in the allowance is based on past experience and on a continuous review of receivable reports and other relevant factors.

When an account receivable is deemed doubtful of collection, an allowance is provided during the year the account is deemed doubtful.

Any receivable or portion of receivable judged to be uncollectible is written off. Write-offs of receivables are made while making allowance for doubtful accounts after all efforts to collect such amounts have been exhausted.

#### (a) Accounts Receivable - Donors

Accounts receivable from donors consist of claims from donors for grants promised or pledged in accordance with the terms specified by the donor. It also pertains to claims from donors for expenses paid on behalf of projects in excess of cash received.

#### (b) Accounts Receivable - Employees

Accounts receivable from employees consist of advances made to officers and employees for travel, benefits, salary, loans, etc.

#### (c) Accounts Receivable - Other CGIAR Centers

This includes advances made to other CGIAR Centers.

#### (d) Accounts Receivable - Others

Accounts receivable from others consist of advance payments to consultants and other third parties.

## 1.12. Prepaid Expenses

These comprise deposits and advances to suppliers.

#### 1.13. Inventories

Inventories are valued at the lower of acquisition cost or net realizable value and charged when used. The acquisition cost includes the purchase price plus cost of freight, insurance and handling charges. Cost is determined by the weighted average method. Provision is made where necessary for obsolete, slow moving and defective items.

ST & YOU

Chartered

# Accounting Policies (contd..)

# 1.14. Property, Plant and Equipment

Property, Plant and Equipment are defined as tangible assets that:

- (a) are held by IWMI for use in the production or supply of goods or for administrative purposes;
- (b) are expected to be used for more than one accounting period

#### II. Recognition

An item of property, plant and equipment should be recognized as an asset when:

- (a) it is probable that future economic benefits associated with the asset will flow to the Center; and
- (b) the cost of the asset can be measured reliably.

All individual tangible assets of USD 500 or over in cost with an estimated useful life beyond one year are treated as fixed assets and designated property, plant and equipment.

Gains or losses arising from the retirement or disposal of property, plant and equipment are determined as the difference between the estimated net disposal proceeds and the carrying amount of the asset, and are recognized as a revenue or expense in the statement of activities.

#### III. Valuation

Property, Plant and Equipment are initially measured at cost. Subsequent to initial recognition as an asset, Property, Plant and Equipment are carried at cost less any accumulated depreciation and any accumulated impairment losses.

The cost of an item of Property, Plant and Equipment comprises its purchase price and all other incidental costs in bringing the asset to its working condition for its intended use.

#### Depreciation

Depreciation of Property, Plant and Equipment is calculated on the straight-line basis over the estimated useful lives of the assets as follows:

Leasehold property Over the lease period (25 years) Heavy-duty equipment 7 years Office and household furniture, fixtures, 5 years research and office equipment Vehicles 5 years

Computer software 3 years Computer hardware 3 years

Depreciation of acquired assets is made in the year the asset is placed in operation and continues until the asset is fully depreciated or its use is discontinued.

Property, Plant and Equipment acquired though the use of grants restricted for a certain project are recorded as an asset. Such assets are depreciated at a rate of 100% and the depreciation expense is charged directly to the appropriate restricted project.

#### IV. Leasehold Property

Leasehold property and improvements thereon are amortized over the lease period or if shorter, the useful economic life of the property or improvement concerned.

The initial lease agreement between IWMI and the Government of Sri Lanka is for 25 years commencing from 1991. IWMI has the right to negotiate for an extension of the lease period under the lease agreement upon the expiry of the current lease.

# 1.15. Accounts Payable

Accounts payable represent amounts due to donors, employees and others for support, services and materials received prior to year-end, but not paid for as at balance sheet date.

#### (a) Accounts payable - donors

This consists of grants received from donors for which conditions are not yet met and amounts payable to donors in respect of any unexpended funds received in advance for restricted grants.

#### (b) Accounts Payable - Employees

This includes unpaid salaries and bonuses, leave credits and pension entitlements.

#### (c) Accounts Payable - Others

These include all other liabilities the center has incurred and has been billed for, which remain unpaid as at the balance sheet date.

# 1.16. Amounts Held for the CGIAR Challenge Program on Water and Food (CPWF)

Amounts held for the CGIAR Challenge Program on Water and Food (CPWF) relate to funds received for the benefit of the participating organization in the CPWF. Funds received are recorded as amounts held for the CPWF in the Statement of Financial Position, until the funds are distributed to participating organizations as determined by the CPWF.

#### 1.17. Accruals

The amount is comprised of accruals and provisions made for suppliers for which invoices were not yet received as at the balance sheet date.

## 1.18. Provisions

A provision is a liability of uncertain timing or amount. A provision should be recognized when:

- (a) a center has a present obligation as a result of a past event;
- (b) it is probable that an outflow of resources will be required to settle the obligation; and
- (c) a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision should be the best estimate of the expenditure required to settle the present obligation at the balance date. Provisions should be reviewed at each balance date and adjusted to reflect the current best estimate. A provision should only be used for expenditures for which the provision was originally recognized.

#### 1.19. Terminal Benefits

#### Defined Benefits Plan

# Severance, Gratuity and Leave Encashment

The Institute's net obligation in respect of Severance, Gratuity and Leave Encashment, which are defined benefit plans, are determined based on an actuarial valuation carried out by an independent qualified actuary and are accrued at the balance sheet date. The liabilities are not externally funded.

#### (a) Severance and Gratuity

#### Severance

In accordance with the terms and conditions of recruitment, internationally recruited staff members are entitled to terminal benefits referred to as "Severance" on the completion of three full years of continuous service.

#### Gratuity

Payment is made for gratuity benefits under the Center's personnel policies to nationally recruited staff. Nationally recruited staff qualify for a gratuity payment on the completion of five years continuous service with the Center.

#### (b) Unutilized Leave

Payment is made for unutilized leave to internationally and nationally recruited staff members in accordance with the Personnel Policies Manual on the following bases:

- International staff maximum of 48 days based on current salary
- National staff maximum of 35 days based on current salary

#### (c) Repatriation

In accordance with the terms and conditions of recruitment, internationally recruited staff members and their dependants are entitled to repatriation benefits on completion of the contract period. Provision is made for repatriation payable to all international staff members based on the estimated cost of airfare, relocation charges and freight charges.

#### 1.20. Net Assets

Net Assets are the residual interest in IWMI's assets remaining after liabilities are deducted.

The overall change in net assets represents the total gains and losses generated by IWMI's activities during the year.

Net assets are classified as either undesignated or designated.

- (a) Undesignated that part of net assets that is not designated by IWMI's management for specific purposes.
- (b) **Designated** that part of net assets that has been designated by IWMI's management for specific purposes.

#### 24. Post Balance Sheet Events

No events have occurred since the balance sheet date which would require adjustment to or disclosure in the financial statements.

#### 25. Overhead Costs Recovery

Overhead costs recovery represents the overhead costs recovered from restricted projects based on the rates agreed and as stated in each project document with Donors. The cost ratio presented in NOTE 20 has been computed based on the provisions of CGIAR Financial Guidelines 5.

#### 26. Commitments and Contingent Liabilities

There are no commitments and contingent liabilities at the Balance Sheet date.
