# Management statement of responsibility for Financial Reporting

The accompanying financial statement of the International Water Management Institute (IWMI), for the year ended December 31, 2012 and 2011 are the responsibility of the management. IWMI management also claims responsibility for the substance and objectivity of the information contained therein.

Our financial reporting practices follow the "Accounting Policies and Reporting Practices Manual – Financial Guidelines Series No. 2" of the CGIAR. IWMI maintains a system of internal control designed to provide reasonable assurance that assets are safeguarded and transactions are properly recorded and executed in accordance with management's authorization.

A system of reporting within the Institute present the management with an accurate view of the operations, enabling us to discern risks to our assets or fluctuations in the economic environment of the institute at an early stage and at the same time providing a reliable basis for the financial statements and management reports.

The board of Governors exercises its responsibility for these financial statements through its Finance and Audit committee. The committee meets regularly with management and representatives of the external auditors to review matters relating to financial reporting, internal controls and auditing.

Jeremy Bird
Director General

Director Finance & Administration

# Statement of the Board Chair For the Year ended December 31, 2012

In 2012, the Institute started implementing the CGIAR Research program 5 on "Water, Land & Ecosystems" (WLE). Significant efforts were made and resources invested in getting the program started by putting a team in place, building partnerships and initiating the activities. During the year, the Institute worked on ensuring that the program is developed and aligned with the Consortium's current expectations and future vision. In 2012, Dr. Colin Chartres completed his term as Director General and Mr. Jeremy Bird was selected and started his term as the new Director General.

Financially, IWMI continued to build on its strong past performance and is in a sound position having ended the year with a surplus. The approval rate of the Institute's project proposals continued to be high, with additional projects in excess of \$10 mil approved during the year. The increased portfolio resulted in total revenue of\$ 47.3 million in 2012 as against\$ 35.1 million in 2011. This significant increase in revenue resulted primarily due to CRP income; particularly WLE Window 1 and 2 funding for \_participating centers, including Challenge program. The approval of a number of bilateral projects and the Institute's focus on delivering on those projects, the W1&W2 funding freeze witnessed during the latter part of the year and resultant uncertainty prompted the Institute to be conservative in its spending on WLE. As a result of these influences, 2012 recorded carryover in WLE funding from Window 1 and 2. We are confident that joint fund raising efforts of the Consortium together with IWMI and its partners will result in 2013 funding to be in line with our expectation so as to undertake the promising research stated in the WLE proposal. For now, the 90% guarantee provide by the Consortium together with the 2012 carry over would allow the program and its partners to continue the work without any of the major setbacks that were experienced in 2012.

Though IWMI's financial situation remains stable and its prospects look promising, the Centre is not immune to new financial or operational risks. The Institute's Board of Trustees takes an active role in monitoring the institute's risk management strategy, not only from the perspective of financial elements, but also with respect to research strategies and issues. The Board has adopted a risk management policy that has been communicated to all staff together with a detailed management guideline. The policy includes a framework by which the Institute's management identifies, evaluates and prioritizes risks and opportunities across the organization; develops risk mitigation strategies that balance benefits with costs; monitors the implementation of these strategies; and reports, in conjunction with finance & administration staff and internal audit, annually to the full Board, on results. The Board is satisfied that the organization has adopted and implemented a comprehensive risk management system.

Some of the key risks facing the Institute relates to the implementation of WLE from the perspective of research delivery, financial compliance and resulting change management. Additionally, as seen in 2012, the availability of staff capacity is critical for successful delivery of Institute's research portfolio. The Board is satisfied that adequate mitigation measures are in place and proactive steps to minimize risk have been initiated by the management in consultation with the Board. We are confident that these are being adequately addressed and that IWMI's new 2014-18 strategic plan will outline the choices we have made and how these will translate into action.

IWMI invests its funds in line with the policy approved by the Governing Board and regularly updates the Governing Board on the implementation of the policy.

On behalf of the members of the Board, I wish to thank IWMI's investors and partners for their continued support and commitment of the work of IWMI.

**Donald Blackmore** 

Chair, IWMI Board of Governors

# **Accounting Policies**

#### **Reporting Entity**

The International Water Management Institute (IWMI) was established in 1984 as a non-profit, scientific research organization focusing on the sustainable use of land and water resources in agriculture, to benefit poor people in developing countries. IWMI's mission is "to improve the management of land and water resources for food, livelihoods and the environment". The Institute works in partnership with developing countries, international and national research institutes, universities and other organizations to develop tools and technologies that contribute to poverty reduction as well as food and livelihood security. IWMI is a member of the CGIAR Consortium.

Under an agreement with Ford Foundation (acting on behalf of International Irrigation Management Institute), signed on 9th January 1985 and ratified by Act, No 6 of 1985, the Sri Lankan Government recognizes IWMI (previously known as IIMI) as a not for profit international organization and grants the Center certain privileges, including exemption of Sri Lankan Government taxes.

The Institute's major facilities are located in India, Pakistan, Nepal, Laos, Uzbekistan, Ghana, Ethiopia and South Africa.

The Institute receives support from various donor agencies and entities, including the CGIAR Consortium. The CGIAR Consortium is an international organization that, together with the CGIAR Fund, advances international agricultural research for a food secure future by integrating and coordinating the efforts of those who fund research and those who do the research. The CGIAR Consortium is made up of the Consortium Board; the Consortium Office; and Research Centers which are members of the CGIAR Consortium.

#### **Major Changes in operation**

CGIAR Research Programs (CRPs): In 2011, the CGIAR introduced a new programmatic based approach to doing business. The Donors to the CGIAR, represented by the Fund Council, approved the creation of fifteen CRPs, each to be led by a designated Center (Lead Center) which is responsible, through a Program Implementation Agreement (PIA) for overseeing the implementation of the CRP by program participants and for all payments to and reporting from program participants. Program participants include other Centers who are subcontracted by the Lead Center via a Program Participant Agreement (PPA) or other suitable contracting arrangement.

Fund donors may designate their contribution to one or more of the three funding "Window". For Window 1 funds, the Fund Council sets the overall priorities and makes specific decisions about the use of the fund such as allocation to CRP's payment of System Costs and any other use required to achieve the CGIAR mission. Window 2 funds are contributions designated by Fund Donors to one or more specific CRPs. Window 3 funds are contributions designated by the Fund Donors to individual centers.

IWMI is the Lead Center for the CGIAR Research Program 5 (CRP5) on Water, Land and Ecosystems (WLE), which started in January 2012 for a period of 3 years, with a total grant of US\$ 246 Million, comprising of Window 1 & Window 2 from Consortium and bilateral raised by participating centers including IWMI. As a Lead Center, the Institute entered into an agreement (PIA) with the Consortium for the overall performance of the CRP. The institute will receive the grants from Windows 1 & 2 for further allocation to the participating centers. The Institute is required to submit regular financial reports and cash flow statements to the Consortium Office. IWMI is also contributing to CRP7 (Climate Change, Agriculture and Food Security), CRP1.1 (Dryland Systems), CRP1.2 (Humid Tropics Systems) and CRP1.3 (Aquatic Agricultural Systems).

The accompanying financial statements and supplementary schedules and statements of the institute were approved and authorized for issue by the Board of Governors on April xx, 2013.

#### **Summary of Major Accounting Policies**

The principal accounting policies that were adopted in the preparation of these financial statements are set out below:

#### 1.1. Basis of Accounting

The financial statements are prepared under the historical cost convention on the accrual basis of accounting, in accordance with the CGIAR Accounting Policies and Reporting Practices Manual, Financial Guidelines Series, No.2 as amended in February, 2006 and Advisory Note - Issued by the CGIAR Consortium Office on 25th January 2013.

#### 1.2. Significant Accounting Judgments, Estimates and Assumptions

#### **Judgments**

In the process of applying the International Water Management Institute's accounting policies, the management has made the following judgment, apart from those involving estimations, which has the most significant effect on the amounts recognized in the Financial Statements.

#### Allowance for Doubtful Debts:

The Institute reviews all receivables at each Statement of Financial Position date to assess whether an allowance should be recorded in the statement of activities. The management uses judgment in estimating such amounts in the light of the duration of outstanding and any other factors the management is aware of that indicate uncertainty in recovery.

#### **Estimates and Assumptions**

The key assumptions concerning the future and other key sources of uncertainty of estimation at the Statement of Financial Position, that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are discussed below. The respective carrying amounts of assets and liabilities are given in related notes to the Financial Statements.

#### **Defined Benefit Plans:**

The cost of defined benefit plans - severance, gratuity and leave encashment are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases and mortality rates. Due to the long term nature of these plans, such estimates are subject to significant uncertainty. Refer Note 19.

#### 1.3. Foreign Currencies

Transactions denominated in currencies other than the reporting currency, United States Dollars (USD), are converted to USD at the exchange rates prevailing at the beginning of the month in which the transaction took place.

Monetary assets and liabilities expressed in currencies other than USD are converted to USD at the rate of exchange prevailing on the date the Statement of Financial Position was prepared. Nonmonetary items denominated in a foreign currency, which are carried at cost, are reported using the exchange rate prevailing on the date of the transaction.

All exchange gains or losses resulting from such translations are treated as other revenues and gains or other losses and expenses in the statement of activities.

#### 1.4. Revenue

#### I. Definition

Revenue is the gross inflow of economic benefits during the period arising in the course of the ordinary activities of a center where those inflows result in increases in net assets. The major portion of center's revenue is derived through the receipts of donor grants - either "Unrestricted" or "Restricted".

Unrestricted grant revenue arises from the unconditional transfer of cash or other assets to IWMI. Transitional Funding received from not fully operated CGIAR Research Program (CRP)'s shall be reported as Unrestricted Grant Revenue.

Restricted grant revenue arises from a transfer of resources to IWMI in return for past or future compliance related to the operating activities of the Organization.

Gross inflow of economic benefits include amounts collected on behalf of the principal and which do not result in an increase in the net assets are treated as "Agency Transactions" and are not recognized as revenue. Revenue is treated as the amount of any commission or management fee received.

#### II. Recognition

Grants are recognized as revenues when the outcome of a transaction involving the rendering of services can be measured reliably. Revenue associated with the transaction is recognized by reference to the stage of completion of the transaction at the Statement of Financial Position date. When the outcome of the transaction cannot be estimated reliably, revenue is recognized only to the extent of the expenses recognized that are recoverable.

As a Lead Center, grants received for the CGIAR Research Programs (CRPs) are recognized in full amount of grants received from the CGIAR Window 1 and 2, including the amounts passed on to other centers and spent by them. Disbursements to another center by the Lead Center are be recorded as an "Account Receivable" until an expenditure report is received from the other center, and the expenditure amount can then be liquidated from the advance.

#### III. Valuation

Revenue is measured at the fair value of the consideration received or receivable.

- (a) Cash grants are recorded at the face value of the cash received or the USD equivalent.
- (b) Grant revenue, including non-monetary grants at fair value, is recognized when there is reasonable assurance that:
  - i. the organization will comply with the conditions attached to them; and
  - ii. the grants will be received.
- (c) Grants are recognized as revenue over the periods necessary to match them with the related costs which they are intended to compensate, on a systematic basis.

#### 1.5. Other Revenues

Other revenues and gains are recognized in the period in which they are earned.

#### 1.6. Expenses

Expenses are recognized when a decrease in future economic benefits, related to a decrease in an asset or an increase in a liability, has arisen that can be measured reliably. Expenses are recognized on the basis of a direct association between the costs incurred and the earning of specific items of revenue.

The Institute presents on the face of the statements of activities an analysis of expenses using a classification based on the function and nature of expenses within the Institute.

Research expenses are expenses incurred for the activities that result in goods and services being distributed to beneficiaries, project proponents, and members that fulfill the purpose of mission for which the Institute exists.

General and Administration expenses are all expenses incurred for the activities of the Institute other than Research Expenses.

Collaborators/Partnership costs arises from the collaborative researchers undertaken by the Institute and Payments for direct research inputs made to collaborators and partners.

#### 1.7. Allocation of Expenses

Direct costs are charged specifically to the programs benefited. Research support and Management, and administrative costs are collectively referred to as indirect costs.

Indirect costs are allocated to programs based on the total direct. The costs of providing the programs and management and general activities have been summarized on a functional basis in the Statement of Activities. Accordingly, certain costs have been allocated among programs and other services, and management and general activities.

#### 1.8. Taxation

The Center is exempt from income tax under the provisions of Section 7 of the Inland Revenue Act No. 10 of 2006 of Sri Lanka. The Center is also exempt from USA (United States of America) tax under

Section 501(a) of the Internal Revenue Code of the United States of America, as an organization described in Section 501(c)(3).

#### 1.9. Cash and Cash Equivalents

Cash and cash equivalents comprise cash in hand, balances with banks and short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturity periods of three months or less, and which are subject to an insignificant risk of change in value.

#### 1.10. Investments

Investments acquired with the intention of disposing the same within one year or less from the acquisition date are classified as current investments. Investments classified as current, as distinguished from cash equivalents, are those that are acquired with original maturities of more than three months, but not exceeding one year.

Current investments represent time deposits with banks that are collateral against national staff loan schemes with original maturities of more than three months.

#### 1.11. Accounts Receivable

All receivable balances are valued at their net realizable value, that is, the gross amount of receivable balances minus, if applicable, allowances provided for doubtful accounts.

Allowances for doubtful accounts are provided in an amount equal to the total receivables shown, or reasonably estimated to be doubtful of collection. The amount in the allowance is based on past experience and on a continuous review of receivable reports and other relevant factors.

When an account receivable is deemed doubtful of collection, an allowance is provided during the year the account is deemed doubtful.

Any receivable or portion of receivable judged to be uncollectible is written off. Write-offs of receivables are made while making allowance for doubtful accounts after all efforts to collect such amounts have been exhausted.

#### (a) Accounts Receivable - Donors

Accounts receivable from donors consist of Unrestricted grants which are due and receivable by a Center and Amounts due from restricted grants that have been negotiated between a donor and the Center. It also pertains to claims from donors for expenses paid on behalf of projects in excess of cash received.

#### (b) Accounts Receivable – Employees

Accounts receivable from employees consist of advances made to officers and employees for travel, benefits, salary, loans, etc.

#### (c) Accounts Receivable - Other CGIAR Centers

This includes advances made to other CGIAR Centers. Under CRP that disbursements to another center by the Lead Center should be recorded as an "Account Receivable" until an expenditure report is received from the other center, and the expenditure amount can then be liquidated from the advance

#### (d) Accounts Receivable - Others

Accounts receivable from others consist of advance payments to suppliers, consultants and other third parties.

#### 1.12. Prepaid Expenses

These comprise deposits and advances to suppliers.

#### 1.13. Inventories

Inventories are valued at the lower of acquisition cost or net realizable value and charged when used. The acquisition cost includes the purchase price plus cost of freight, insurance and handling charges. Cost is determined by the weighted average method. Provision is made where necessary for obsolete, slow moving and defective items.

#### 1.14. Property, Plant and Equipment

#### I. Definition

Property, Plant and Equipment are defined as tangible assets that:

- (a) are held by IWMI for use in the production or supply of goods or for administrative purposes; and
- (b) are expected to be used for more than one accounting period

#### II. Recognition

An item of property, plant and equipment should be recognized as an asset when:

- (a) it is probable that future economic benefits associated with the asset will flow to the Center; and
- (b) the cost of the asset can be measured reliably.

All individual tangible assets of USD 500 or over in cost with an estimated useful life beyond one year are treated as fixed assets and designated property, plant and equipment.

Gains or losses arising from the retirement or disposal of property, plant and equipment are determined as the difference between the estimated net disposal proceeds and the carrying amount of the asset, and are recognized as a revenue or expense in the statement of activities.

#### III. Valuation

Property, Plant and Equipment are initially measured at cost. Subsequent to initial recognition as an asset, Property, Plant and Equipment are carried at cost less any accumulated depreciation and any accumulated impairment losses.

The cost of an item of Property, Plant and Equipment comprises its purchase price and all other incidental costs in bringing the asset to its working condition for its intended use.

#### **Depreciation**

Depreciation of Property, Plant and Equipment is calculated on the straight-line basis over the estimated useful lives of the assets as follows:

Leasehold property - Over the lease period (25 years)

Heavy-duty equipment - 7 years

Office and household furniture, fixtures,

research and office equipment

- 5 years

Vehicles - 5 years

Computer software - 3 years

Computer hardware - 3 years

Depreciation of acquired assets is made in the year the asset is placed in operation and continues until the asset is fully depreciated or its use is discontinued.

Property, Plant and Equipment acquired through the use of grants restricted for a certain project are recorded as an asset. Such assets are depreciated at a rate of 100% and the depreciation expense is charged directly to the appropriate restricted project.

#### IV. Leasehold Property

Leasehold property and improvements thereon are amortized over the lease period or if shorter, the useful economic life of the property or improvement concerned.

The initial lease agreement between IWMI and the Government of Sri Lanka is for 25 years commencing from 1991. IWMI has the right to negotiate for an extension of the lease period under the lease agreement upon the expiry of the current lease.

#### 1.15. Accounts Payable

Accounts payable represent amounts due to donors, employees and others for support, services and materials received prior to year-end, but not paid for as at the date of Statement of Financial Position.

#### (a) Accounts payable - donors

This consists of grants received from donors for which conditions are not yet met and amounts payable to donors in respect of any unexpended funds received in advance for restricted grants.

#### (b) Accounts Payable – Employees

This includes unpaid salaries and bonuses, leave credits and pension entitlements.

#### (c) Accounts Payable – Others

These include all other liabilities the center has incurred and has been billed for, which remain unpaid as at the Statement of Financial Position date.

# 1.16. Undisbursed funds for the CGIAR Challenge Program on Water and Food (CPWF)

Undisbursed funds for the CGIAR Challenge Program on Water and Food (CPWF) relate to funds received for the benefit of the participating organization in the CPWF. Funds received are recorded as amounts held for the CPWF in the Statement of Financial Position, until the funds are distributed to participating organizations as determined by the CPWF.

#### 1.17. Accruals

The amount is comprised of accruals and provisions made for suppliers for which invoices were not yet received as at the Statement of Financial Position date..

#### 1.18. Provisions

A provision is a liability of uncertain timing or amount. A provision should be recognized when:

- (a) a center has a present obligation as a result of a past event;
- (b) it is probable that an outflow of resources will be required to settle the obligation; and
- (c) a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision should be the best estimate of the expenditure required to settle the present obligation at the balance date. Provisions should be reviewed at each balance date and adjusted to reflect the current best estimate. A provision should only be used for expenditures for which the provision was originally recognized.

#### 1.19. Terminal Benefits

#### **Defined Benefits Plan**

#### Severance, Gratuity, Leave Encashment & Repatriation

The Institute's net obligation in respect of Severance, Gratuity and Leave Encashment, which are defined benefit plans, are determined based on an actuarial valuation carried out by an independent qualified actuary and are accrued at the Statement of Financial Position date. The liabilities are not externally funded.

#### (a) Severance and Gratuity

#### Severance

In accordance with the terms and conditions of recruitment, internationally recruited staff members are entitled to terminal benefits referred to as "Severance" on the completion of three full years of continuous service.

#### Gratuity

Payment is made for gratuity benefits under the Center's personnel policies to nationally recruited staff. Nationally recruited staff qualify for a gratuity payment on the completion of five years continuous service with the Center.

#### (b) Unutilized Leave

Payment is made for unutilized leave to internationally and nationally recruited staff members in accordance with the Personnel Policies Manual on the following bases:

- International staff maximum of 48 days based on current salary
- National staff maximum of 35 days based on current salary

#### (c) Repatriation

In accordance with the terms and conditions of recruitment, internationally recruited staff members and their dependents are entitled to repatriation benefits on completion of the contract period. Provision is made for repatriation payable to all international staff members based on the estimated cost of airfare, relocation charges and freight charges.

#### 1.20. Net Assets

Net Assets are the residual interest in IWMI's assets remaining after liabilities are deducted.

The overall change in net assets represents the total gains and losses generated by IWMI's activities during the year.

Net assets are classified as either undesignated or designated.

- (a) **Undesignated** that part of net assets that is not designated by IWMI's management for specific purposes.
- (b) **Designated** that part of net assets that has been designated by IWMI's management for specific purposes.
