

Action for Adaptation

How We Manage Water for Climate Change Resilience

December 5, 2019, 15:00 - 16:30

Hall 4, Room 6, IFEMA Feria de Madrid,
Av. del Partenón, N° 5, 28042 Madrid, Spain (Subway line 8)

International Water Management Institute (IWMI) and
World Water Council (WWC)

Alliance for Global Water Adaptation (AGWA)

Water is at the heart of climate change but is not on the political radar. Efficient and sustainable water management is the principal measure through which societies can adapt to climate change. Join us at this side event, led by the International Water Management Institute (IWMI) and the World Water Council, bringing together experts to further catalyze actions by highlighting how smarter water management can deliver critical adaptation solutions.

The accompanying report, “Adaptation’s thirst: Accelerating the convergence of water and climate action,” will be available on www.iwmi.org and www.gca.org from December 5, 2019.
