The International Water Management Institute (IWMI) is a non-profit, scientific research organization dedicated to providing evidence-based solutions to sustainably manage water and land resources for food security, people’s livelihoods and the environment.

www.iwmi.org

IWMI is a CGIAR center focused on research for development.

www.cgiar.org

The CGIAR Research Program on Water, Land and Ecosystems (WLE), led by IWMI, promotes a new approach to sustainable intensification in which a healthy functioning ecosystem is seen as a prerequisite to agricultural development, resilience of food systems and human well-being.
