Every 2' flange to the floor, the flange to be 9"x9" and fixed firmly to the floor using steel anchor bolts, the edges of the flange to be well rounded and child proof.

The partition to hold the 2"x4" to protrude out 90mm and to have a recessed nut and bolt in both directions to hold the vertical firmly.
A PLAN

One opening to be an operable window for the gully sucker to access the manholes. This to have locks at higher level where children cannot reach.

B EXTERIOR WALL PARTITION

12mm thick tempered glass. S/S fixing accessories to be included. The S/S framed to be recessed in to the brick walls and hidden so only the glass can be seen.

225mm thick brick wall with smooth finished plaster ('conflow' added) on both sides. This to be painted with master pallet paint.

The top lintel to have a 1" x 1" drip ledge.

The bottom frame to be exposed and the plaster to slope outwards.

ELEVATION - A

Note = Internal and the external walls to be painted with 5 CIC 5 coat.

The bottom sill of the opening to slope outwards by 6" and this to be waterproofed.

PROJECT : Proposed Creche for IWMI

DRAWING TITLE : Architectural Drawing - Exterior Wall Partition

CLIENT : International Water Management Institute
