> Female-headed households face new patterns of vulnerability, with an increase in labor burden accompanied by limited access to and control over water resources. Addressing this through open dialogue is essential for climate resilience. This workshop helps communities realize the role that gender plays in their lives, and discuss how they can move toward a more equal society.

Acknowledgements

We would like to thank the twelve farmer groups in Dholaguri and Uttar Chakokheti in West Bengal, Bhagwatipur and Mauahi in Madhubani, and Khoksar Parbaha and Koiladi in Saptari. All female and male farmers enthusiastically participated in our training sessions, and taught, inspired and helped us improve the activities. Implementation support and valuable feedback was provided by Fraser Sugden, Emma Karki, Gitta Shrestha, Floriane Clement, Manita Raut, Prasun Deb Kanugoe, Anoj Kumar, Janaki Chaudhary and Sanjay Singh (IWMI Nepal); Rajeshwar Mishra, Mitali Ghosh and Dhananjay Ray (CDHI, West Bengal, India); Suman, Neetu and Ritesh Singh and Rajesh Kumar (SAKHI, Bihar, India); and Indira Chaudhari (iDE, Nepal). The manual was designed and formatted by Andrew Reckers (IWMI) with support from Michael Victor (WLE Knowledge Management and Engagement Coordinator). The activities in this manual were developed, piloted and modified by Stephanie Leder (Postdoctoral Fellow - Gender and Poverty, WLE-IWMI) and Dipika Das (Gender Coordinator, IWMI/ACIAR) within the project 'Dry-season irrigation for marginal and tenant farmers in the Eastern Gangetic Plains' funded by the Australian Centre for International Agricultural Research (ACIAR).
